DETAILED ACTION

Response to Amendment

1. Claims 1-9, 12 and 16 have been amended and claim 18 has been cancelled as requested in the amendment of Paper filed on May 12, 2004. Claims 1-17 and 19-20 are pending in the instant application.

Claims 1-17 and 19-20 are under examination in the instant office action.

2. The Text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Any objection or rejection of record, which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

4. Applicant's arguments filed on May 12, 2004 have been fully considered but they are not deemed to be persuasive for the reasons set forth below.

Information Disclosure Statement

5. The information disclosure statement filed on May 12, 2004 has been considered.

Claim Rejections - 35 USC § 112

6. Claim 9, as amended, stands rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9, as amended, recites "beta-amyloid peptide consists essentially of residues 1-43 of SEQ ID NO: 7". MPEP 2111.03, Transitional Phrases, states that

Art Unit: 1646

“For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, “consisting essentially of” will be construed as equivalent to “comprising.” See, e.g., PPG, 156 F.3d at 1355, 48 USPQ2d at 1355 (“PPG could have defined the scope of the phrase consisting essentially of” for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the basic and novel characteristics of the invention.”). See also *In re Janakirama-Rao*, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963). If an applicant contends that additional steps or materials in the prior art are excluded by the recitation of “consisting essentially of,” applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant’s invention. *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). See also *Ex parte Hoffman*, 12 USPQ2d 1061, 1063-64 (Bd. Pat. App. & Inter. 1989) (“Although consisting essentially of” is typically used and defined in the context of compositions of matter, we find nothing intrinsically wrong with the use of such language as a modifier of method steps. . . [rendering] the claim open only for the inclusion of steps which do not materially affect the basic and novel characteristics of the claimed method. To determine the steps included versus excluded the claim must be read in light of the specification. . . . [I]t is an applicant’s burden to establish that a step practiced in a prior art method is excluded from his claims by consisting essentially of” language.”).

Thus, in accordance with MPEP 2111.03, presently recited “consists essentially of” is interpreted as “comprises”. Consequently, the metes and bounds of the recited molecular embodiment, a peptide comprising residues 1-43 of SEQ ID NO: 7, wherein

Art Unit: 1646

SEQ ID NO: 7 is limited to 43 amino acids, cannot be determined from the claim or the instant specification. See also reasons of record in section 10 of the office action mailed on February 06, 2004.

7. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. Claim 10 depends from claim 1, which is not limited to radioactively labeled peptides, which allow for scintillation assay. Thus, a radioactive label, as an essential element, is not present in claim 10.

Conclusion

8. Claims 1-8, 11-17 and 19-20 are allowed. Claims 9-10 are rejected.
